

ENGLISH FOR ENGINEERS IN SAN DIEGO

MAXIMUM
4 students
per class

PROGRAM DESCRIPTION

This course is aimed at providing clients at the B2 upper-intermediate level and higher with the tools necessary to function in professional engineering communications. The primary focus is on improving the client's ability to communicate effectively and with confidence in the following areas: high-priority language in any branch of engineering such as mechanical, electrical, civil etc. for engineers, engineering technicians and technical managers.

COURSE OBJECTS AND LEARNING OUTCOMES:

The objectives of this course are achieved by using an integrated approach to learning. The text book for this course includes Cambridge English for Engineering with support materials. After completing this course, clients will be able to:

- describe technical functions, design phases and procedures, health and safety precautions, automated systems, physical forces, capabilities and limitations
- explain how technology works, manufacturing techniques, jointing, fixing techniques, tests and experiments
- discuss quality issues and all relevant aspects
- suggest ideas and solutions
- emphasize technical advantages and the importance of precautions
- work with written instructions, drawings, and notices

COURSE FEATURES

- 4 students per class
- 20 lessons (16.7 clock hours) per week
- Class schedule: Monday – Friday 9:00 am to 12:40 pm
- Strong emphasis on improving speaking and pronunciation skills through curriculum specifically designed for the engineering field.
- Student assessment and success are measured through quizzes that include engineering-related vocabulary and speaking skills. Speaking quizzes are assessed in both testing formats and role-playing formats.

REQUIREMENTS:

Students who qualify for the English for Engineers course must be at the (CEFR) B2 upper-intermediate level or higher.
